

# CARING FOR YOUR ARTIFICIAL GRASS.

Most installations can be left to the elements as they are hardy, but simple maintenance will help keep it in a pristine condition.

Always remove pet waste as soon as possible.

If you have a power blower utilise to keep it free from leaves and dust. Alternatively use a grass brush, sweep with the pile to easily collect the leaves.

Use FloorGuard Carpet Cleaner for general food spills. Rinse thereafter with a hose pipe.

To maintain a fresh look and prevent odours spray with solution of water & Ammonia bi-monthly.

Do not place a braai directly onto the grass. Stray coals could melt the fibres.

Although the product is weed proof, weeds can grow on the edges where soil collects. Spray weed killer around the edges when necessary or every 6 months.
